Instructions

This document currently contains 2413 references, arranged alphabetically. I plan to update it periodically. Corrections, additions, and suggestions are welcome. Eventually I hope to also post on this site a version of this same list of resources, arranged thematically (by subtopics). This list of citations was compiled with version 5.0.34 of Zotero and formatted according to the Unified Style Sheet for Linguistics Journals. In this file I have not fixed every inconsistency in terms of spelling, capitalization, missing fields, etc. Consequently, there are no guarantees about the accuracy of every detail. Nevertheless, most of the mistakes are relatively minor and should not obscure the reader’s understanding of the citations in most cases. I would be happy to provide this same list of references in a different style, format, or sorting order, upon request.
